killing has emerged as a buzz word in the policy environment. The thrust for a policy-backed Skill Development Initiative is a significant step towards realizing the potential of the Indian workforce by enhancing its skill-ability and thus employability. The Skill India initiative seeks to strengthen institutional training, training of trainers, infrastructure and leveraging of public infrastructure so as to enhance employment both nationally and internationally for the attainment of sustainable livelihoods of the majority workforce. However, there remains a huge gap between the current levels and the desired goals in terms of creating a higher or threshold level skilled workforce, so as to see India as a developed nation in the near future. But, the proportion of formally skilled workers in India is extremely low at 4.09% of the total workforce compared to China’s 24%, 52% in the US, 68% in the UK, 75% in Germany, 80% in Japan and 96% in South Korea. It is clear that India lags far behind.

The foremost challenge is the existence of a huge proportion of unskilled or poorly trained workers in the informal sector wherein the largest employment generation occurs in the country. The major challenge is that though the net enrolment rate in primary education (grades 1-5) is almost universal, almost half of the enrolled children dropped out from school, and entered the workforce without acquiring the basic numeracy and literacy skills. Thereby, the large majority of skill training is carried out through self-taught practices, observation or transfer of skills from a master crafts-person to an apprentice. Though the National Skill Qualification Framework makes efforts to provide the training of a largely unskilled workforce, it needs to go a long way in this regard.

Yet another concern in India is the mismatch between skill, academic training and employment and this has broadened to such an extent, on the one hand, employers are unable to discover suitably trained people, while on the other, the youth is unable to find the aspired jobs. According to the latest India Skill Report (2019), mere 45.6% of youth graduating from educational institutions are employable. In this context, it is imperative to understand the levels of skills, their demand and the ‘returns to skill’ concepts.

It is an inevitable fact that a better-skilled person always remains in a better position in terms of earnings. But to understand the impact of skills on employment and earnings one needs to take a closer and analytical look at it. The International Labour organization concept on The International Standard Classification of Occupations (ISCO-08) provides a framework to make it possible to compare occupational data internationally. ISCO-08 does not seek to substitute existing national classifications of occupations but enables inter-country comparisons by aligning occupational

CAREER OPPORTUNITIES IN FOOD NUTRITION & DIETETICS

Dr. Utara Singh

Proper nutrition is one of the most essential elements to being healthy and living a long life. People deal with food every day, and food has been a part of life since the beginning of civilization. What we eat becomes our diet, and our diet plays a major role in deciding how healthy we are and how well our body functions. Without proper diet, our body cannot carry out the functions it needs to perform. Most people have some common knowledge on what is good and what is bad for the human body to consume. The effective management of food intake and nutrition are key to good health. Smart nutrition and food choices can help prevent disease. Eating the right foods can help your body cope more successfully with an ongoing illness. Understanding good nutrition and paying attention to what you eat can help you maintain or improve your health. The term ‘food’ brings to our mind countless images. We think of items not only that we eat and drink but also how we eat them and the places and people with whom we eat and drink. Food plays an important role in our lives and is closely associated with our existence. It is probably one of the most important needs of our lives. The food that we eat is composed of small units that provide nourishment to the body. These are required in varying amounts in different parts of the body for performing specific functions. This means that good nutrition is essential for good health. However, if our diet provides the important units in incorrect amounts, either very less or in excess of what is required, it results in an imbalance of nutrients in your body. The condition is responsible for various deficiency diseases and slow or no growth of the body. Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism and excretion. Nutrition-related jobs exist in a huge range of employment sectors, from health care and education to food service and manufacturing. One could potentially work in hospitals, schools, wellness centers, corporate cafeterias, research labs, and many other settings. With food and nutrition careers, there’s plenty to explore and plenty of ways to make a difference. Broadly speaking, nutritionist/dietitian’s careers focus on the relationship between food and health. Being a nutritionist means understanding the physiological ways the human body responds to food and the role that nutrients

3. Food manufacturing

A public health nutritionist is an expert in diet and nutrition who helps people improve public nutritional habits instead of working one on one with individual clients. They are registered dieticians, and they work on implementing strategies for a community or for a large organization that will improve the nutrition of the population, and they do this by conducting surveys that will help improve the health and wellbeing of the people. Dieticians in this practice area work in settings like public health clinics, fitness centers, corporate wellness programs or home health agencies.

6. Food product development scientist

A food safety auditor reviews and analyzes the safety and sanitation procedures involved in the processing, manufacturing, or service of food to ensure that food is safe for human consumption. These professionals inspect, write reports, and sometimes educate workers on the policies and procedures.

9. Food labeling specialist

Food labeling specialists are responsible for coming up with the nutritional labels on food products. They ensure that the products are safe, ingredients, recalls, and food allergies are accurate and in line with industry regulations.

10. Corporate wellness consultant

A growing number of private businesses and corporations are hiring wellness consultants to provide guidance on healthy eating and lifestyle habits. These consultants might offer general tips on nutrition and health or lead seminars on how to be healthy in the workplace.

11. Food safety auditor

Food safety auditors are responsible for inspecting food safety and food manufacturing facilities to ensure compliance with government regulations.

12. Nutrition services manager

Nutrition services managers plan and coordinate the large scale delivery of nutritionally appropriate meals. This role involves ordering supplies, managing budgets, and overseeing food preparation.

13. Humanitarian nutritionist

Humanitarian nutritionists evaluate the food supply systems in developing countries and develop programs to fill any nutritional gaps. They may assist in establishing community gardens, helping individuals with essential nutrients or distribution networks.

14. School nutritionist

School nutritionists are responsible for coming up with menus that are nutritious and appealing, while also addressing the dietary needs of students.

15. Nutrition writer

As a nutrition writer, one could channel his/her food and diet expertise into writing about nutrition, food, science, or a related field.

16. Nutrition assistant

In a hospital, nursing home, or other clinical care setting, nutrition assistants typically prepare food, distribute meals, and ensure that patients get the proper nutrition. They talk to patients about food preferences, record how much each patient ate, and report any dietary issues to the supervisor.

17. Food Service Management

Food service directors work in a variety of settings including: hospitals, long-term care and assisted living facilities, schools, universities, government and military facilities. In addition to ensuring food safety and general nutrition, these managers are also responsible for implementing business strategies, marketing, and customer service.

18. Public Policy

Public policy professionals work in the government sector, some of the organizations (like FNB, ICMR, Government Nutrition Education Centers, Corporate Wellness Organizations, etc.), and local and state/central government agencies. They are responsible for coming up with the policy and helping to implement it. They also help develop a nutritional plan for the community. They provide guidance on healthy eating and lifestyle habits. These professionals might offer general tips on nutrition and health or lead seminars on how to be healthy in the workplace. They work with individuals or organizations to improve their health outcomes.

19. Community food worker

Community food workers work in schools, community centers, and other food service facilities to ensure compliance with government regulations. They are responsible for inspecting food safety and food manufacturing facilities. In addition to ensuring food safety and food manufacturing regulations, public health departments are responsible for inspecting restaurants and other food service facilities. This includes compliance with food safety regulations. Individuals who pursue a career in food safety may benefit from gaining knowledge in political science, sociology, environmental science and sustainability, and public health. As a food safety auditor, you will be responsible for inspecting food safety and general nutrition, marketing, advertising and public relations.

20. Sustainable Nutrition/ Food Systems

A public health nutritionist is an expert in diet and nutrition who helps people improve public nutritional habits instead of working one on one with individual clients. They are registered dieticians, and they work on implementing strategies for a community or for a large organization that will improve the nutrition of the population, and they do this by conducting surveys that will help improve the health and wellbeing of the people. Dieticians in this practice area work in settings like public health clinics, fitness centers, corporate wellness programs or home health agencies.

**Backlog unfilled vacancies of earlier recruitment exercises. If suitable candidates from respective reserved category are not available for these backlog posts then PwD candidate of other category can be considered by interchange of category among identified suitable posts and if no suitable PwD person even by interchange of category is available, the posts will be filled up with other than person with disability.

**Note:**

- The courses offered by Institutes / Universities through the regular mode should be approved / recognized by the relevant statutory bodies for employment to posts and services under the central Government like Association of Indian Universities (AUI) / UGC/AMICE etc. Candidates who have obtained their qualification through Distance Learning / part time mode are also eligible to apply provided their qualification is recognized by the relevant statutory bodies for employment to posts and services of the central government.
- Qualifications mentioned in the table above are sacrosanct. No equivalent Qualification will be accepted e.g. AMIE will not be considered where qualification is Graduated degree in Engineering.
- Calculation of percentage of marks in the qualifying degree is as per University / Institution rules.
- d. Wherever CGPA/OGPA/CPI/DGPA or letter grade in degree is awarded, equivalent % of marks should be indicated in the online application as per norms adopted by concerned University/ Institute. Please also attach a certificate to this effect from the University/ Institute, which shall be required to be submitted at the time of interview. If university/institute does not have the provision for conversion of CGPA/OGPA/CPI/DGPA or letter grade into percentage then minimum 6 on 10 point scale will be considered as 60%.
- e. Students in final year/semester of the qualifying course of study are also eligible to apply. However, if such candidates are short listed for interview and they do not possess qualifying degree with minimum prescribed percentage of marks, wherever applicable, at the time of interview, their candidature will be treated as provisional subject to submission of documentary proof of having completed all requirements of completing the qualifying degree with minimum prescribed percentage of marks, wherever applicable, by 31.07.2019. If they fail to submit the document by 31.07.2019, their candidature will be summarily rejected and no communication will be entertained in this regard.
- f. In case there is no mention of specialization in the qualifying degree as required in the Minimum Essential Qualifications above, candidates are to submit a certificate at the time of interview from their institution / university with a clear mention of their specialization in the qualifying degree.
- g. Where the posts specified in this advertisement are not reserved for a category (ies), a reserved category candidate can also apply provided he/ she fulfill the criteria specified for Unreserved Category. He/ She shall be treated at par with unreserved category candidates in selection process.

Saurabh Suman Yadav has got 55th rank in the recently announced results of Civil Services Exam-2018 conducted by the Union Public Service Commission.

Responding to the queries from Employment News, Saurabh said one should persist and not give up even if things do not go well. He attributed his success to persistence and hard work. Here are the answers he gave in response to Employment News question.

Employment News wishes you heartiest congratulations on your exceptional achievement! We are happy that your hard work has paid off. How did you feel when you came to know that you did not have only succeeded in one of the toughest exams in India but your name also got a good rank? Can you share those moments of happiness with our readers?

It was a dream come true and this was something for which I had put in a lot of effort. More importantly I felt happy for my family who had made innumerable sacrifices to support me in the entire preparation process.

Q) What is the secret of your success?

There is no secret. I feel it’s about persisting and not giving up when things don’t go well. Instead I tried to stay strong and learn from failures and try even harder next time. I also tried not to worry about things that were beyond my control.

Q) How did you approach this exam? What was your strategy in general (Prelims, Mains, and interview)?

The first step was to study the syllabus for the examination and totally internalize it. Next, I looked at previous years papers in order to get an idea of the examination. I tried to limit my source for various subjects so that I could finish the syllabus on time and have time for revision. I learnt from the first few attempts that a lot of writing practice is a must for success in this examination and hence I devoted at least half my time to writing practice. I also subscribed to a test series in order to evaluate my preparation and make course correction both for prelims and mains.

For interview I thoroughly prepared each and every point on my DAF (Detailed Application Form). I took 2 mock interviews and took guidance from colleagues and seniors.

Q) What were your strategies for the lengthy syllabus of General Studies for both Prelims and Mains?

Prelims set 1

For general studies papers, I focused on reading basic text books thoroughly, have a good hold on current affairs and finally attempt one complete test series to evaluate preparation.

Mains: GS 1 - For the static topics I read standard text books. Section on Indian Society is slightly dynamic and hence I also covered current affairs related to the topics.

GS 2 and GS 3 - Along with standard text books I also studied current affairs related to the topic and tried to link the static and current affairs portion. Newspapers are a very good source of information for these two papers. I read Indian Express and Mint every day.

GS 4 - For GS 4, I tried to have a clear understanding of each word and phrase in the syllabus. Subsequently I focused on the application of these concepts in case studies. I also prepared a list of keywords and examples from various sources in order to have a ready reference.

Books that I referred to for Prelims and Mains have a lot in common and hence I followed an integrated approach. Paper 1 of prelims covers many topics for GS papers 1, 2 & 3. However, one month before the prelims examinations, I focused exclusively on prelims.

Q) How did your prepare for essay?

For essay preparation I did a lot of practice. I tried to write at least two essays each week for 3 months and have it reviewed by friends. I also took an essay test series. Knowledge of general studies paper comes in handy in essay writing. I also tried to learn from sample essays of topper available on the internet. The topics I picked in CSE 2018 exam were

1. Poverty anywhere is a threat to prosperity everywhere
2. Customary morality cannot be a guide to modern life

Q) How did your manage your time during the preparation?

I tried to put as many hours as possible before and after office hours. I tried to use the weekends effectively. I also ensured that due weightage was given to each section of syllabus - Essay, General Studies and Optional.

Q) How did you manage your tempo and what did you do to break the monotony of preparation?

I tried to stay focused on achieving my target. I order to break the monotony, I switched subjects that I was studying. I also indulged in sports and outdoor activities like running to keep myself motivated.

Q) Your advice for future aspirants.

I come from a very humble background and I feel whatever little success I have achieved is due to my persistence, hard work and learning from past mistakes. If you inculcate these principles in your life, you will have a good chance of achieve your goals.

classifications to ISO-09 in concept and structure.

In the Indian context, many studies estimate returns to education at the national level using NSSO data, India Human Development Surveys 1 and 2 (IHDS), National Sample Survey Data on Savvy Patterns of India, etc. But, there are hardly studies that investigate the labor-market return on skill due to the absence of skill-based

earnings data.

Skills measurement:
To bridge this gap, ICE360\textsuperscript{2} (2016) survey of 60,360 households and 2,570,720 individuals covering multi-dimensional aspects of the economy, society, and polity plays a crucial role. Geographically, the sample has been drawn from across 216 districts, 1,217 villages and 487 towns spread across 25 major states. By applying ISCO-08 concepts to ICE360\textsuperscript{2} (2016), authors have classified the skill levels of workers taking into account their ability to carry out tasks and duties of a given job for which the person earns a remuneration. This corresponds to 62.4% of the total population who belong to the working-age group of 15 to 65 years who are eligible to work excluding students and those unable to work.

Workforce Profile by Skill levels:

Little above half (56\%) of the labour market is dominated by people who are classified as Type 2 skill level while 30\% constitutes skill level 1 type. Nearly 11\% of the population can be classified at skill level 3 while the smallest share is that of skill level 4.

It is not surprising that higher skill level individuals reside in urban areas, due to the availability of numerous employment opportunities. On the contrary, a mere 26\% of skill level, 2 individuals residing in urban areas.

Slightly more than half of skill level 1 individual are in the 15-35 years age group. This is a serious cause of concern that a major share of young India possesses low skills. The rest that is about 40\% of the young workforce consists of other skill levels.

As one would expect, there is a high correlation between skill level and education. Higher the education, higher the skill level. It can be clearly seen that only 3\% of skill level 1 individual have high educational qualifications compared to 65\% of workers classified as skill level 4.

Even within the same employment type, there are significant differences in earnings across different skill levels. A regular salaried earner, at skill level 4, on an average makes Rs 500,000 a year (US $7000) which is about 2.2 times higher than his counterpart at skill level 1.

Data suggest that individuals who are classified as having skill level 4 have the highest average annual individual income of Rs. 420,000 (US $6000 based on the average exchange rate 2019). This is about 1.5 times higher than that of a worker with skill level 3 (Rs 280,000 or US $4000). This person's earning is 3.1 times higher than that of skill level 1 worker (Rs 137,000 or US $2000) than his counterparts. The divergence in earnings between skill levels is quite apparent. The contributing factors are many, viz. Education, age, gender, region, etc.

Factors contributing to variations in returns to skills:

Characteristic corresponds to the labour force is that the higher skill levels are dominated largely by higher educated workers, while casual jobs are offered to those with lower educational qualifications. In the past, there was no advantage for female workers to be highly educated as it did not translate into higher wage earnings when skilled to their not-so-well-educated counterparts. But in recent times, factors such as age, education, skill levels, gender, a sector of employment as well as digital access play key roles in income differentials. These correlations have been established using robust statistical exercises.

Gender is a key determinant in the earnings differential. Males earn almost 1.2 times the wages earned by females. This earning gap gives men an advantage in the overall job market. However, there has been a considerable upswing in the share of females being recruited for jobs with higher skill levels.

Skill and education linkages are critical to assessing returns to skills: the central idea being that there is a premium on higher education and hence better-educated workers receive higher earnings. Age is normally associated with the person's experience and thus plays a key role in determining the earnings. At the basic skill levels - i.e. 1 and 2 - the earnings increase with age but the rate of increase is marginal. While entry-level workers at skill levels 3 and 4 belong to the age group of 21 to 25 years, implying that there is certain minimum education need to accomplished these higher order skill levels and therefore higher earnings. This further widens the gap between workers at skill levels 1 and 2 in relation to those at skill levels 3 and 4 (Figure 1).

Earnings by levels of education are illustrated with the age-earnings profiles of the population in the 15-65 years group. As expected, there is a clear-cut relationship between levels of education and earning as experience and on-the-job training adds to improved skills over the years. This relationship is strengthened as one moves up in the educational ladder (Figure 2).

Regular salaried income offers a foreseeable income stream and is most likely to be associated with better job security. Only 13\% of skill level 1 worker report that they had a regular salary. In contrast, 60\% of workers classified as skill level 4 earns regular salaries. Skill level 1 workers, on the other hand, receive 75\% of their earnings from non-agriculture wage labour as daily wages. It is important to note that skill level 3 and 4 workers are concentrated in regular salaried and self-employed non-agriculture occupations. This wide disparity in skill levels of the labour force is a cause for concern in terms of employability.

Digital usage has widened the earnings differential across skill levels. Our data shows that as skill levels rise, ICT usage too grows. Besides, the use of internet at the individual level also shows a positive relationship with returns to skills. The Internet-using individual earns more than double that of non-users. For example, if an average Indian earns Rs 100, the ICT user earns Rs 169 while the non-ICT user's earning is only Rs 80. This is evident across all skill level types. Based on this, one can argue that internet usage plays a vital role in increased earnings.

Yet another variation in earnings can be from the dwelling units of the workforce.

More than three-fourths of skill level 4 workforce resides in pucca houses while only 35\% of skill level 1 worker do so. Household amenities like tap water, a separate kitchen, an in-house toilet, and liquefied petroleum gas (LPG) stove are mostly to be found in the houses of skill level 4 workers. The home conditions of the workers with skill level 4 are indeed superior in terms of various household amenities. However, access to electricity connections is a common feature across all skill level type households.

Clearly, this skill level concept can help us better understand the connection between earnings and quality of labour force. Such analysis is likely to provide important insights regarding the skill levels, which would require re-qualification and re-specialization of the labour force in order to compete in fast-changing globalized India. It can further be used to retrain and equip the workforce with adequate skills. At the concluding note, a substantial share of the population is still at skill levels 1 and 2 (86\%) and is thus earning much lower than those with skill levels 3 and 4. This is a huge concern for policymakers as well as the youth of India. There is an urgent need to take a serious look at the education system including technical vocational training in order to correct the anomalies that currently exist and enable the growing workforce to respond to the growing demand for skilled workers as well as improve their earnings.
